

Foreword

The 6th AicQoL2018PerhentianIslands with "*Quality of Life in the Built and Natural Environment 6*" as the main theme managed to attract an overall total of 67 numbers of approved abstracts, from three countries.

Majority of the abstracts (62 numbers or 93%) were contributed by Malaysia. This was followed by Thailand (3), and Taiwan (2). The abstracts approved were simply grouped generally under 16 sub-categories, although quite a number could have been easily placed under more than one category. The top two categories in order of popularity involved the following environments: - Local Heritage Environment and Community Environment / Social Psychology (8 each); and Children/Youth Environment, Health/Healing Environment, and Urban Environment (7 each).

The abstracts were finally transformed into 46 approved full papers. Majority of the full papers (41 numbers, or 89%) were contributed by Malaysia. This was followed by Thailand (3), and Taiwan (2). The full papers approved were simply grouped generally under 14 sub-categories, although again, quite a number could have been easily placed under more than one category. The top three categories in order of popularity involved the following environments:- Community Environment / Social Psychology (8); Local Heritage Environment (6); Children/Youth Environment, Health/Healing Environment, Hospitality/Tourism Environment, Landscaping Environment and Urban Environment (4 each).

The Association of Malaysian Environment-Behaviour Researchers (AMER), the main organiser, together with the co-organisers, ABRA and cE-Bs, FAPS, UiTM congratulate all contributors for making the conference a tremendous success!

Hopefully this conference will inspire and encourage more researchers to participate in our forthcoming serial conferences.

Thanks again for your continuous support as always, and hope for an enlightening conference!

About the Conference

Background

The AMER (ABRA *malaysia*) support for the AcE-Bs and AicE-Bs conferences, initially organised by the Centre for Environment-Behaviour Studies (cE-Bs), FAPS, UiTM, Malaysia, and co-hosted by international colleagues within the Environment-Behaviour (EB) disciplines, have been held and planned to be away from Malaysia, worldwide.

There is a need for an annual serial internationally very relevant behavioural-themed conference in/nearby Malaysia, not only for the benefit of AMER / ABRA local members who could not participate at the AcE-Bs and AicE-Bs conferences being held worldwide, but also for potential international participants who would like to present their papers in/nearby Malaysia. What behavioural-themed can be most relevant affecting all nations than the QoL (Quality of Life)?

Thus, the timely and relevance of the annual serial back-to-back ASEAN-Turkey ASLI (Annual Serial Landmark International) Conferences on QoL. The **AicQoL**, *AMER International Conference on Quality of Life*. shall be held at the ASEAN venues, while the **AQoL**, *ABRA International Conference on Quality of Life* shall be held in Turkey, or non-ASEAN countries.

AicQoL was also strategized to coincide with AMER's AGMs. The maiden AicQoL2013Langkawi was held on 6-7 April 2013. That was followed by AicQoL2014KotaKinabalu, 04-05 January 2014; AicQoL2015Jakarta, 25-27 April 2015; AicQoL2016Medan, 25-27 February 2016, and AicQoL2017Bangkok, 25-27 February 2017. The anchor theme of the conference is "*Quality of Life in the Built & Natural Environment*".

6th AicQoL2017PerhentianIslandsTheme: Quality of Life 6

The Quality of Life (QoL) has been a central issue for decades, not only for disciplines involved in the creation of the built environment and the management of the natural environment but more importantly of the impact upon the global communities, due to the growing pressures of development. QoL shall forever not only remain central, as "quality" is subjected to continuous improvement but also subjective because the interpretation differs between communities in the more developed regions as compared to those in developing regions. The QoL concept is also linked to Sustainable Development, such that unless we engage with more sustainable practices, the QoL in both the built and natural environments would soon be deteriorated.

AicQoL2018PerhentianIsland contributes to the debate and solutions on the QoL concept as a key element of responsive environmental design impacting various communities. In particular, which affects the currently 4.3 billion Asian communities worldwide - about 60% of the world population. Special focus shall be upon the wellbeing of those Asian communities, with a high growth rate, living in both the Asian and non-Asian countries. which involves the following environments (though not exhaustive):-

Children's Environment; Commercial/Retail/Services Environment; Communication Environment; Community Environment / Social Psychology; Construction Environment; Disabled / Inclusive Environment; Educational / Learning Environment; Elderly Environment; General Psychology; Healing / Healthcare Environment; Hospitality / Tourism Environment; Landscaping Environment; Legal Matters; Leisure / Recreational / Sports Environment; Local Cultural / Heritage Environment (Food included); Natural Environment; Residential Environment; Rural Environment / Rural Psychology; Technology-related Environment; Transportation / Travelling Environment; Urban Environment / Urban Psychology; Workplace Environment; etc.
