Association of Malaysian Environment-Behaviour Researchers (AMER); Association of Behavioural Researchers on Asians (ABRA);  
Centre for Environment-Behaviour Studies (cE-Bs), Faculty of Architecture, Planning & Surveying, Universiti Teknologi MARA, Malaysia

# Acknowledgement

This 5th AMER International Conference on Quality of Life, AicQoL2017Bangkok, was made possible by many persons.

Deepest appreciation to our Co-Host, the Faculty of Architecture, Chulalongkorn University, Bangkok, Thailand, which had ensured the smooth running and success of the conference.

Many thanks also to the more than 60 International Scientific Committee (ISC) / Editorial Board Members, represented from 22 countries worldwide, for their continuous commitment and dedication for reviewing the conference papers.

Last but not least, our gratitude to the Distinguished Keynote Speakers, Abstract Contributors and Paper Presenters for disseminating their works and findings at this most memorable conference. Their continuous support in participation endorses the relevance and sustenance of more successful forthcoming conferences.

*Thank you all !*

# Organising Committee

## **Mohamed Yusoff Abbas, Prof., Dr.**

Chair, AicQoL2017

President, AMER (Association of Malaysian Environment-Behaviour Researchers)

President, ABRA (Association of Behavioural Reserachers on Asians)

Head, cE-Bs, Faculty of Architecture, Planning & Surveying, UiTM, Malaysia

## **Siriwan Silapacharanan, Emer. Prof., Dr.**

Co-Chair, AicQoL2017

Chulalongkorn University, Bangkok, Thailand.

# Foreword

The AicQoL2017Bangkok with "Quality of Life in the Built and Natural Environment 5" as the main theme managed to attract an overall total of 89 numbers of approved abstracts, from four countries

Majority of the abstracts (60 numbers or 67%) were contributed by Malaysia. This was followed by Thailand (17), Indonesia (11), and Iran (1). The abstracts approved were simply grouped generally under 19 sub-categories, although quite a number could have been easily placed under more than one category. The top four categories in order of popularity involved the following environments:- Urban Environment / Urban Psychology (12 numbers or 13%), Community Environment / Social Psychology (11), Construction Environment and Residential Environment (9, each respectively)

The abstracts were finally transformed into 67 approved full papers. Majority of the full papers (45 numbers, or 67%) were contributed by Malaysia. This was followed by Thailand (15) and Indonesia (7). The full papers approved were simply grouped generally under 18 sub-categories, although again, quite a number could have been easily placed under more than one category. The top three categories in order of popularity involved the following environments:- Urban Environment / Urban Psychology (9 numbers or 13%), Community Environment (8) and Healing/Health Environment, Landscaping Environment, Residential Environment (all 6 each).

The Association of Malaysian Environment-Behaviour Researchers (AMER), the main organiser of AicQoL2017, together with the Co-Host, Faculty of Architecture, Chulalongkorn University, Bangkok, Thailand, congratulate all contributors for making the conference a tremendous success!

Hopefully this conference will inspire and encourage more researchers to participate in our forthcoming serial conferences.

Thanks again for your continuous support as always, and hope for an enlightening conference!

**Prof. Dr. Mohamed Yusoff Abbas**

Chair, AicQoL2017Bangkok

# About the Conference

## Background

The AMER (ABRA *malaysia*) support for the AcE-Bs and AicE-Bs conferences, initially organised by the Centre for Environment-Behaviour Studies (cE-Bs), FAPS, UiTM, Malaysia, and co-hosted by international colleagues within the Environment-Behaviour (EB) disciplines, have been held and planned to be away from Malaysia, worldwide.

There is a need for an annual serial internationally very relevant behavioural-themed conference in/nearby Malaysia, not only for the benefit of AMER / ABRA local members who could not participate at the AcE-Bs and AicE-Bs conferences being held worldwide, but also for potential international participants who would like to present their papers in/nearby Malaysia. What behavioural-themed can be most relevant affecting all nations than the QoL (Quality of Life)?

Thus, the timely and relevance of the annual serial back-to-back ASLI (Annual Serial Landmark International) Conferences on QoL. The **AicQoL**, *AMER International Conference on Quality of Life*. shall be held at the ASEAN venues, while the **AQoL**, *ABRA International Conference on Quality of Life* shall be held in non-ASEAN countries. AicQoL was also strategized to coincide with AMER's AGMs. The maiden AicQoL2013Langkawi was held in 6-7 April 2013, That was followed by AicQoL2014KotaKinabalu, from 04-05 January 2014; AicQoL2015Jakarta, from 25-27 April 2015; and AicQoL2016Medan, from 25-27 February 2016. The anchor theme of the conference is "*Quality of Life in the Built & Natural Environment*".

## AicQoL2017Bangkok: Theme Synopsis

### **"Quality of Life in the Built and Natural Environment 5"**

Quality of Life (QoL) has been a central issue for decades, not only for disciplines involved in the creation of the built environment and the management of the natural environment, but more importantly of the impact upon the global communities, due to the growing pressures of development. QoL shall forever not only remain central, as "quality" is subjected to continuous improvement, but also subjective, because the interpretation differs between communities in the more developed regions as compared to those in developing regions. The QoL concept is also linked to Sustainable Development, such that unless we engage with more sustainable practices, the QoL in both the built and natural environments would soon be deteriorated.

AicQoL2017Bangkok, contributes to the debate and solutions on the QoL concept as a key element of responsive environmental design impacting various communities. In particular, which affects the currently 4.3 billion Asian communities worldwide - about 60% of the world population. Special focus shall be upon the wellbeing of those Asian communities, with a high growth rate, living in both the Asian and non-Asian countries., which involves the following environments (though not exhaustive):-

Children's Environment; Commercial/Retail/Services Environment; Community Environment / Social Psychology; Construction Environment; Disabled/Inclusive Environment; Educational/Learning Environment; Elderly Environment; General Psychology; Healing/Healthcare Environment; Hospitality/Tourism Environment; Landscaping Environment; Legal Matters; Leisure/Recreational/Sports Environment; Local Cultural/Heritage Environment (Food included); Natural Environment; Residential Environment; Rural Environment / Rural Psychology; Technology-related Environment; Transportation/Travelling Environment; Urban Environment / Urban Psychology; Workplace Environment; etc.
